MATHÉO GROS

Montréal, QC • matheo.gros@outlook.fr • linkedin.com/in/matheo-gros

SUMMARY

AI & Data Science engineering student (Polytechnique Montréal / UTC double degree) with industry experience at Ubisoft and Savencia: end-to-end ML pipelines, segmentation of 200M+ users, predictive maintenance and LLM/RAG applications. Led a 10-person IT consulting team generating €250K in revenue over 3 years.

EDUCATION

POLYTECHNIQUE MONTRÉAL Montréal, QC
Master of Engineering (M.Eng.), Computer Engineering, Double Degree *Expected 2028*
- Coursework: Artificial Intelligence, Machine Learning, Data Mining, Computer Vision, Signal & Image Processing.

UNIVERSITÉ DE TECHNOLOGIE DE COMPIÈGNE (UTC, Alliance Sorbonne Université) Compiègne, France
Engineering Degree (Diplôme d'Ingénieur), Computer Engineering, AI & Data Science *Expected 2027*
- Coursework: Data Structures & Algorithms, Data Warehousing, Business Intelligence & SQL, Statistics, Data Science.

LA SALLE LILLE & ACADEMICA | *French Baccalauréat, Highest Honors; U.S. High School Diploma* *2022*

EXPERIENCE

SAVENCIA - *Data Science Consultant, Predictive Maintenance* *Feb 2026 - Aug 2026, Compiègne, France*
- Designed an end-to-end predictive maintenance pipeline on CMMS data, from extraction and cleaning to modeling and reporting.
- Built survival analysis models and machine learning classifiers to predict equipment failures and maintenance interventions.
- Applied NLP clustering and generative AI to unstructured technician comments to surface recurring failure patterns.
- Partnered with 3 research professors in data science and industrial reliability to improve maintenance processes and strategy.

UBISOFT - *Data Scientist Intern, Audience Analytics (Finance & Publishing)* *Sep 2025 - Feb 2026, Paris, France*
- Segmented 200M+ players with K-Means and K-Modes clustering to support anti-churn, VIP and high-value player strategies.
- Developed LightGBM predictive models (tracked with MLflow) for churn, high-value prospect detection and recommendations.
- Built end-to-end data pipelines on Databricks and Snowflake, orchestrated with Airflow and versioned with Git.

JUNIOR UTC (student-run consulting firm) **-** *IT Business Development Manager* *Sep 2023 - Aug 2026, Compiègne, France*
- Generated €250K in revenue over 3 years by managing client relationships, project follow-up and contract drafting.
- Led a team of 10 consultants delivering IT projects for clients: ERP, BI, data analysis, AI integration and machine learning.
- Co-developed an internal ERP & CRM platform to track client engagements end to end.
- Built an AI legal-compliance assistant (RAG, Open WebUI) answering staff questions on the firm's regulatory framework.

PROJECTS

Data Warehouse & BI Dashboard | *Databricks, Snowflake, Airflow, Power BI* *2026*
- Built a full ETL pipeline using a medallion architecture (bronze, silver, gold) orchestrated with Airflow.
- Delivered an interactive Power BI dashboard on top of the warehouse for business reporting.

RAG System for Intellectual Property Research | *Python, LLMs, RAG, Open WebUI,* *2026*
- Developed a retrieval-augmented generation system to search and query intellectual property documents.

AI Prospecting Assistant | *Python, LLM API, Apollo* *2026*
- Architected a 3-module LLM chatbot finding prospect companies: API-based sourcing, contact enrichment, web-search monitoring. Scoped and delivered in 4 phases (architecture, engine, UI, testing) for self-hosted deployment on the client's server.

LEADERSHIP & ACTIVITIES

CNJE (French National Confederation Of Junior Entreprises) - *Auditor-Consultant* *2024-2026*
- Audited junior enterprises on regulatory compliance, strategy, sales, HR and contracts (budget, timelines, invoicing).

UTC STUDENT FEDERATION - *Partnerships Manager* *2024-2025*
- Managed partnerships and co-designed the 2025–2027 strategy for a federation of 3,000 members and 120+ associations.

SKILLS & INTERESTS

Programming: Python, SQL, C++, C, R, JavaScript, PHP, LISP
Machine Learning & AI: Predictive Modeling, LightGBM, Clustering (K-Means, K-Modes), Survival Analysis, NLP, LLMs, RAG
Data & MLOps tools : Databricks, Snowflake, Airflow, MLflow, ETL, Data Warehousing, PostgreSQL, Power BI, Git
Languages: French (Native), English (Fluent, C1), Spanish (Professional, B2), Mandarin Chinese (Elementary)
Interests: Rugby, Fencing, Travel (USA, Mexico, Finland, Scotland), Event Organization
